

The Georgia Historical Society Genealogical Vertical File Index

The GHS Genealogical Vertical File Index is a guide to the contents of the Genealogy vertical files maintained by GHS. Vertical files contain newspaper clippings, journal articles, and various published and un-published resources about a particular family/surname. Names listed in the index in capital letters have individual files. Names that do not appear in all capital letters are combined in group folders. Vertical files are accessible in the research center reading room. See or See Also references are to vertical files or additional genealogical resources in the GHS library and archives reading room.
