Now it's your turn to create a historical marker! Remember to use the following guidelines:

- Construct historical marker text so that it is a point by point, chronological narrative of the subject and its historical significance.
- Each line in the historical narrative should be verifiable with resources cited in in your research document.
- Propose historical marker text that is 130 words or less. This does not include titles and the "erected by" language (the organizations who created the marker).
